

COVID-19

SYMPTOMATIC DECISION TREE

*Per CDC, exposure is close contact of 6 feet or less for 15 minutes or more.

**This is subject to change if community transmission increases beyond moderate or substantial controlled transmission.

***Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation.

Contact at greater than 6 feet or for less than 15 minutes is generally not sufficient to transmit the virus.
