

### Step 1: Powering On

To power on your laptop, press the power button on the top right corner of the keyboard.

If the laptop doesn't power on, plug the power cord in, wait 10 seconds, and try again. In some cases you may need to leave your laptop plugged in during use.

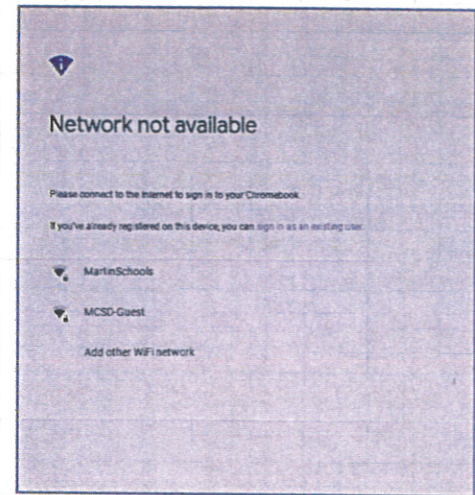

### Step 2: Sign into Wifi

Click on the **network icon**. Select the desired Wi-Fi network. Click **Connect**. You must know the password to the chosen network. Type the network password. Click **Next**.

Once the network says "Connected, secured" you have successfully connected to a Wi-Fi network.

It may say "Connected, unsecured" if you have connected to a Wi-Fi network without a password. This will still work.

### Step 3: Sign in with @sbmc Google Credentials
